PLANETKULEMØLLE PM 200

The Planetary Ball Mill PM 200 is a powerful benchtop model with 2 grinding stations for grinding jars with a nominal volume of 12 ml to 125 ml.

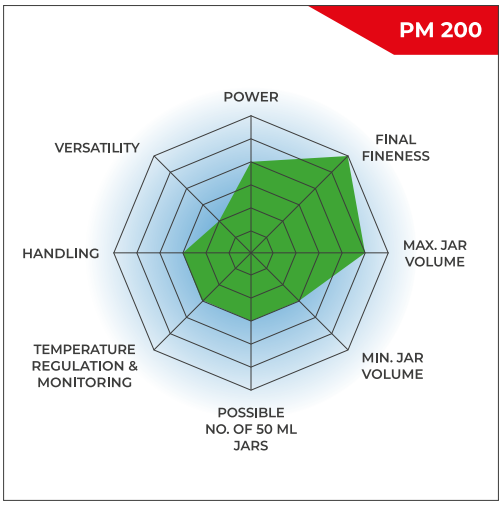
The extremely high centrifugal forces of Planetary Ball Mills result in very high pulverization energy and therefore short grinding times.

The PM 200 can be found in virtually all industries where the quality control process places the highest demands on purity, speed, fineness and reproducibility.

The mill is ideally suited for tasks in research like mechanochemistry (mechano-synthesis, mechanical alloying and mechanocatalysis), or ultrafine colloidal grinding on a nanometer scale, as well as for routine tasks such as mixing and homogenizing soft, hard, brittle or fibrous materials.

TWO GRINDING STATIONS FOR STANDARD APPLICATIONS

- Max. speed 650 rpm
- Up to 10 mm feed size and 0.1 µm final fineness
- 2 grinding stations for jars from 12 ml up to 125 ml, jars of 12 and 25 ml can be stacked (two jars each)
- GrindControl to measure temperature and pressure inside the jar.
- Aeriation lids to control the atmosphere inside the jar
- Storable SOPs and cycle programs, 5 different jar materials for dry and wet grinding



FAST & POWERFUL

- Loss-free size reduction down to the submicron range
- Wet grinding yields particle sizes in the nanometer range (<100 nm)
- Variable speed from 100 to 650 rpm, speed ratio 1:-2
- Grinding with up to 33.3 x acceleration of gravity
- Batch-wise processing with max. 2 x 50 ml sample
- Wide range of materials for contamination free grinding

PLANETKULEMØLLE PM 200

REPRODUCIBILITY, SAFETY AND EASY HANDLING

- Reproducible results due to speed control
- Easy and safe clamping of grinding jars
- The Safety Slider prevents starting the machine without securely clamped jars
- Perfect stability on the lab bench thanks to FFCS technology
- Innovative counterweight and imbalance sensor for unsupervised operation
- Comfortable parameter setting via display and ergonomic 1-button operation
- Automatic grinding chamber ventilation
- 10 SOPs can be stored, programmable starting time
- Power failure backup ensures storage of remaining processing time

SETTINGS & OPTIONS

- Dry and wet grinding possible
- Suitable for long-term trials, 99 h max.
- Interval operation allows for cooling breaks
- Direction reversal helps to minimize caking effects

THE BEST ALTERNATIVE TO A RETSCH PLANETARY BALL MILL? A RETSCH MIXER MILL.

Benefit from particularly ergonomic handling while achieving the same finenesses down to the nanometer range.

SAFETY FIRST: JAR CLAMPING

Operation of the RETSCH planetary ball mills is particularly safe. They feature a robust Safety Slider which ensures that the mill can only be started after the grinding jar has been securely fixed with a clamping device. The self-acting lock ensures that the jar is seated correctly and securely. This proven solid mechanical system is less failure-prone than electronic solutions - the user has full access to the sample at any time. When the electronic system fails, it is not possible to unlock the jars, for example.

WET AND NANO-SCALE GRINDING WITH THE PM 200

Wet grinding is used to obtain particle sizes below 5 µm, as small particles tend to get charged on their surfaces and agglomerate, which makes further grinding in dry mode difficult. By adding a liquid or dispersant the particles can be kept separated.

To produce very fine particles of 100 nm or less (nano-scale grinding) by wet grinding, friction rather than impact is required. This is achieved by using a large number of small grinding balls which have a large surface and many friction points. The ideal filling level of the jar should consist of 60 % small grinding balls.

For more details on jar filling, wet grinding and sample recovery watch the video.

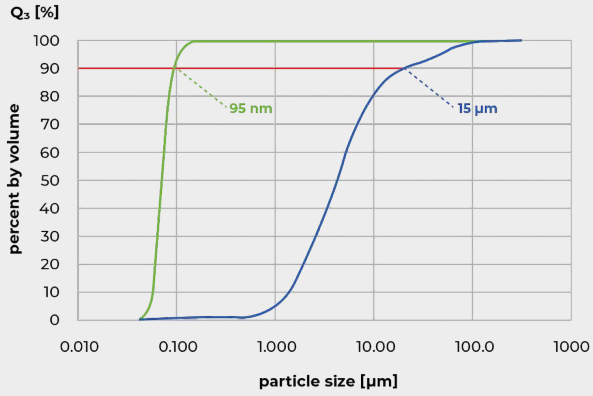
The video shows wet grinding in the Planetary Ball Mill PM 100.

The graphic shows the result of grinding barium titanate at 500 rpm in the PM 200. After 5 h of pulverization in heptane and oleic acid mixture with 0.5 mm grinding balls, the D90 value of the original sample was reduced from 15 µm to 95 nm.



Grinding of barium titanate in heptane and oleic acid mixture with 0.5 mm grinding balls.
Blue curve: original sample; green curve: pulverized sample after 5 h.

EASYFIT GRINDING JARS FOR EXCELLENT RESULTS

The performance and the result of sample preparation are also determined by the choice of the grinding jar and its ball charge. The EasyFit range of jars has been specially designed for extreme working conditions such as long-term trials, even at maximum speed of 800 rpm, wet grinding, high mechanical loads and maximum speeds as well as for mechanical alloying. This line of jars is suitable for all RETSCH planetary ball mills.

The new EasyFit grinding jar series features a structure on the bottom of the 50-500 ml jars called Advanced Anti-Twist (AAT). This ensures that the jars are tightly fixed without the risk of twisting, even at high speed, and that wear and tear is drastically reduced. Secure clamping of the jars is made much easier: to find the correct clamping position, a maximum twist of 60° is required.

The geometry of the EasyFit jars in the 50 ml and 250 ml sizes has been enlarged in diameter and reduced in height compared to the previous "comfort" models. This offers two advantages: better grinding results and interchangeable lids, as there are only three diameter dimensions for the entire grinding jar range.

Diameter categories

- Diameter 1: 12 ml and 25 ml grinding jars
- Diameter 2: 50 ml, 80 ml and 125 ml grinding jars

- Available jar sizes: 12 ml / 25 ml / 50 ml / 80 ml / 125 ml
- Innovative Advanced Anti-Twist (AAT) function ensures secure fit of grinding jars
- High flexibility thanks to suitability of three lid sizes for all seven jar sizes
- Pressure-tight and dust-proof O-ring sealing prevents material spillage
- Jars and balls available in 5 materials: hardened stainless steel, tungsten carbide, agate, sintered aluminium oxide, zirconium oxide
- Stainless steel protective jacket for agate, sintered aluminum oxide, zirconium oxide and tungsten carbide grinding jars
- A groove between jar body and lid allows for easy opening of the lid, e. g. with the help of a spatula, if there are underpressure effects inside the jar

JARS & LIDS FOR SPECIAL APPLICATIONS

- For colloidal or wet grinding, the use of a grinding jar with a special closure device is recommended
- The special closure device is designed for ergonomic handling
- Aeration lids are designed for working under inert atmosphere, for example if oxygen can influence the grinding process or the mechanosynthesis. The lids allow the introduction of gases like argon or nitrogen into the grinding jar.

RECOMMENDED JAR FILLINGS

To produce optimum grinding results, the jar size should be adapted to the sample amount to be processed. The grinding balls are ideally sized 3 times bigger than the largest sample piece. Following this rule of thumb, the number of grinding balls for each ball size and jar volume is indicated in the table below. To pulverize, for example, 50 ml of a sample consisting of 3 mm particles, a 125 ml jar and grinding balls sized at least 10 mm or larger are recommended. According to the table, 30 grinding balls are required.

Grinding jar nominal volume	Sample amount	Max. feed size	Recommended ball charge (pieces)					
			Ø 5 mm	Ø 7 mm	Ø 10 mm	Ø 15 mm	Ø 20 mm	Ø 30 mm
12 ml	opp til ≤5 ml	<1 mm	50	15	5	-	-	-
25 ml	opp til ≤10 ml	<1 mm	95 – 100	25 – 30	10	-	-	-
50 ml	5 – 20 ml	<3 mm	200	50 – 70	20	7	3 – 4	-
80 ml	10 – 35 ml	<4 mm	250 – 330	70 – 120	30 - 40	12	5	-
125 ml	15 – 50 ml	<4 mm	500	110 – 180	50 – 60	18	7	-

The table shows the recommended charges (in pieces) of differently sized grinding balls in relation to the grinding jar volume, sample amount and maximum feed size.

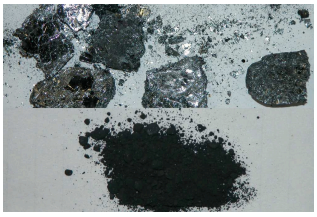
TYPICAL SAMPLE MATERIALS

RETSCH planetary ball mills are perfectly suitable for size reduction of, for example, alloys, bentonite, bones, carbon fibres, catalysts, cellulose, cement clinker, ceramics, charcoal, chemical products, clay minerals, coal, coke, compost, concrete, electronic scrap, fibres, glass, gypsum, hair, hydroxyapatite, iron ore, kaolin, limestone, metal oxides, minerals, ores, paints and lacquers, paper, pigments, plant materials, polymers, quartz, seeds, semi-precious stones, sewage sludge, slag, soils, tissue, tobacco, waste samples, wood, etc.

Medium-hard: biomass

35 g sample
125 ml stainless steel grinding jars
7 x 20 mm stainless steel grinding balls
15 min at 500 rpm

Brittle: tin sulfide

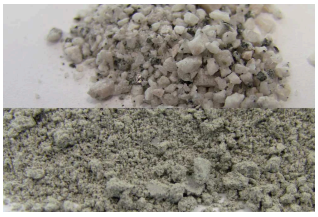


52 g sample
125 ml agate grinding jars
50 x 10 mm agate grinding balls
60 min at 550 rpm
10 min intervals and direction reversal

Fibrous: strå

7 g sample
125 ml zirconium oxide grinding jars
50 x 10 mm zirconium oxide grinding balls
40 min at 300 rpm
10 min intervals and direction reversal

Hard: natural rocks



60 g sample
125 ml stainless steel grinding jars
7 x 20 mm stainless steel grinding balls
10 min at 420 rpm

PLANETKULEMØLLE PM 200

VIRKEMÅTE

The grinding jars are arranged eccentrically on the sun wheel of the planetary ball mill. The direction of movement of the sun wheel is opposite to that of the grinding jars in the ratio 1:-2.The grinding balls in the grinding jars are subjected to superimposed rotational movements, the so-called Coriolis forces.

The difference in speeds between the balls and grinding jars produces an interaction between frictional and impact forces, which releases high dynamic energies. The interplay between these forces produces the high and very effective degree of size reduction of the planetary ball mill.

TECHNICAL DATA

funksjon	pulverizing, mixing, homogenizing, colloidal milling, mechanical alloying, mechanosynthesis, nano grinding
bruksområde	biologi, byggematerialer, chemistry, geologi / metallurgi, glass / keramikk, landbruk, maskinbygging / elektroteknikk, medisin / legemidler, miljø / gjenvinning
matemateriale	mykt, hardt, sprøtt, fibrøs - tørr eller våt
nedmalingsprinsipp	sammenstøt, friksjon
matestørrelse*	< 4 mm
sluttfinhet*	< 1 µm, for colloidal grinding < 0.1 µm
prøvevolum*	max. 2 x 50 ml
antall malestasjoner	2
Turtallforhold	1 : -2
solhjuldiameter	100 - 650 min-1
effektiv solhjuldiameter	157 mm
akselerasjon	37.1 g
type malebeger	EasyFit, optional areation covers, safety closure devices
material i maleverktøyet	herdet stål, rustfritt stål, wolframkarbid, agat, sintret korund, silicon nitride, zirkoniumoksid
Størrelse på malebeger	12 ml / 25 ml / 50 ml / 80 ml / 125 ml
Stackable grinding jars	12 ml / 25 ml
innstilling av maletid	digital, 00:00:01 to 99:59:59
intervalldrift	ja, med retningsreversering
intervalltid	00:00:01 til 99:59:59
pausetid	00:00:01 til 99:59:59
SOPer som kan lagres	10
Målig av energiinput mulig	ja
Grensesnitt	RS 232 / RS 485
drift	3- faset asynkron motor med frekvensomformer
drivkraft	750 W
Elektriske tilkoblingsdata	ulike spenninger
Nettilkobling	1-fase
kapslingstype	IP 30

kraftforbruk:	~ 1250 W (VA)
b x h x d lukket	640 x 480 (780) x 420 mm
nettovekt	~ 76 kg
Normer / standarer	CE
Patent / Utility patent	SafetySlider (DE 202008008473)

*avhengig av matemateriale og apparatkonfigurering /apparatinnstillinger

BESTILLINGSINFO

PLANETARY BALL MILL PM 200

(please order grinding jars and balls separately)

20.640.0001		PM 200	with 2 grinding stations, speed ratio 1 : -2

other electrical versions available for the same price

ACCESSORIES PLANETARY BALL MILLS

22.661.0003		Clamping unit for PM 200
03.025.0178		Adapter for stacking grinding jars 50 ml - 80 ml
02.728.0048		Counter aid for sun wheel PM 100, PM 200 and PM 400
03.486.0062		Opening aid for clamping unit of planetary ball mills
99.200.0008		IQ/OQ Documentation for PM 200

GRINDING JARS EASYFIT

(grinding jars EasyFit are suitable for all planetary ball mills)

HARDENED STAINLESS STEEL		
01.462.0239		12 ml
01.462.0240		25 ml
01.462.0516		50 ml
01.462.0517		80 ml
01.462.0518		125 ml

01.462.0513	125 ml

ACCESSORIES FOR GRINDING JARS EASYFIT FOR WET GRINDING, GRINDING WITH INERT ATMOSPHERE AND MECHANICAL ALLOYING (MA)

AERATION LIDS (INCL. INLAY)		
22.107.0613		for grinding jars EasyFit 50 ml - 125 ml, hardened stainless steel
22.107.0616		for grinding jars EasyFit 50 ml - 125 ml, tungsten carbide
22.107.0617		for grinding jars EasyFit 50 ml - 125 ml, agate
22.107.0615		for grinding jars EasyFit 50 ml - 125 ml, zirconium oxide
22.864.0001		Spare valve set for aeration lids M8x1

INLAY FOR AERATION LID	
03.474.0225	for grinding jars EasyFit 50 ml - 125 ml, hardened stainless steel

03.474.0207		for grinding jars EasyFit 50 ml - 125 ml, tungsten carbide
03.474.0208		for grinding jars EasyFit 50 ml - 125 ml, agate
03.474.0206		for grinding jars EasyFit 50 ml - 125 ml, zirconium oxide

AERATION LIDS FOR GRINDING JARS EASYFIT

INCL. O-RINGS AND SINTERED FILTER (PLEASE ORDER LID INSERT AND GRINDING JAR SEPARATELY)		
22.107.0636		Aeration lid for grinding jar EasyFit 50 ml - 125 ml
22.107.0637		Aeration lid for grinding jar EasyFit 250 ml - 500 ml

INSERT FOR GRINDING JAR EASYFIT		
03.474.0261		Aeration lid insert for grinding jar EasyFit 50, 80 oder 125 ml, stainless steel
03.474.0262		Aeration lid insert for grinding jar EasyFit 50, 80 oder 125 ml, zirconium oxide
03.474.0263		Aeration lid insert for grinding jar EasyFit 50, 80 oder 125 ml, tungsten carbide
03.474.0268		Aeration lid insert for grinding jar EasyFit 50, 80 oder 125 ml, agate
22.186.0007		Sintered filter with O-ring, set of 10 pieces
22.864.0001		Valve set M8x1 for GrindControl and aeration lids

SAFETY CLOSURE DEVICES

22.867.0011		for grinding jars EasyFit 50 ml - 125 ml
02.486.0055		Opening aid for safety closure device

GASKETS FOR GRINDING JARS EASYFIT

O-RINGS		
05.114.0086		O-ring for 12 ml grinding jar EasyFit
05.114.0085		O-ring for 25 ml grinding jar EasyFit
05.114.0056		O-ring for 50 ml - 125 ml grinding jars EasyFit
03.111.0438		Flat gasket for 50 ml, 80 ml or 125 ml
